User questionnaire

- Go over the progress of your team's usability questionnaire
  - Pre-task questions
    -
  - Task/Post-task questions
    - Post-task question: How easy was it to find a specific form?
- Chat about what data you hope to collect and why you think collecting it will provide value to evolving your proposed content strategy/intranet design

Cascade Server progress

- As a group, we did look over the Cascade Server and noticed only one computer can be logged into the session at a time and that it has to be done at the U of R. We played around with it, but never ended up saving any progress thus far.

Group reflection

- How did you feel about this milestone? What did you like about it? What did you dislike?
  - We got to see an idea of what our design, when implemented, would look like.
- What did you learn about yourself as you collaborated and worked through this milestone?
  - We learned that we like to bounce ideas off of one another before finalizing a decision on how the design should be.

Group Reflection(cont.)

- How will you use what you have learned going forward?
  - We have a general understanding of how the Cascade Server works, so this will be beneficial when starting our next milestone.
- What “stuff & things” related to this milestone would you want help with?
  - Getting feedback from the stakeholders on the lo-fidelity design we created would be nice before having the implement it.

thank you for caring
